

Energy Efficiency & Conservation

Zero Cost Program™

While many people view the topic of “energy conservation” as boring and tired, the reality is that there is a myriad of proven scientific tools that if adopted in mass would allow us to reduce energy consumption so much that entire fossil-fuel based power plants could be retired. Additionally, a reduction in consumption of this magnitude would also assist in reducing congestions and transmission problems currently affecting the grid.

Whether you believe in “climate change” or not; it’s everybody’s collective burden to be socially responsible or practice good stewardship. Many business owners view such changes and initiatives as simply too impractical, unattainable and/or costly.

Zenergy is effectively addressing these issues with its trademarked Zero Cost Program™ -- as a matter of fact, one of Zenergy’s mantras is “to significantly

reduce the demand on our national energy grid and the nation’s water supplies”.

Through the Zero Cost Program™, commercial, industrial and municipal end-users can achieve environmental and sustainability goals, at zero out of pocket cost and while also positively impacting their own bottom line.

“While analysis varies, most experts agree, U.S. businesses waste several hundred billion dollars per year in utility expenses due to inefficiencies; Essentially, Zenergy is recouping these dollars at zero out of pocket cost to our clients”

1

Analysis

Our team of experts combs through your current Energy, Water and Natural Gas consumption to find efficiency improvement and savings opportunities.

2

Implementation

Professional installers, under the direction of our Operations Team, Installs an array of Zenergy Solutions tailored to your business’ needs.

3

Guaranteed Results

Your facilities are upgraded and you enjoy significant reduction in Energy, Water and Natural Gas consumption.

“No upfront cost, no large capital expenses to worry about.”

What our customers say about us

In our experience, **going green** comes at a cost premium. The Zero Cost Program™ is changing the game for us. We can now be more environmentally responsible while at the same time add dollars to our bottom line"

Ron Catlett / Senior Vice President of La Fiesta

When I learned about Zenergy's unique sustainability offering, I immediately knew it was something I wanted to implement in our hotel. We believe in optimizing all of our facilities with the latest in efficient technologies and have wanted to undertake such a project for some time now. However, the costs for such large-scale sustainability projects are often exorbitant but thanks to Zenergy's Zero Cost Program™, it is now feasible for businesses like ours."

Roger Thiltgen / Proprietor Tanglewood Resorts

Frequently Asked Questions

How do I know if The Zero Cost Program™ is right for our business?

If you spend between \$100,000 and \$100MM a year on utility expenses, then you're a good candidate for the program. Moreover, Zenergy offers a free no-obligation, analysis that determines if your business is a good fit.

What about cities or school districts?

Yes, the program is for commercial, industrial and municipal end-users of electricity, natural gas and water.

Zero Cost – Sounds too good to be true?

The reality is that your business is already throwing these dollars away each year; Zenergy simply recoups them in a smart and environmentally friendly manner – at zero upfront cost to you. Through conservation and efficiency, we are simply redirecting those dollars to the Zero Cost Program and to YOUR bottom line.

Is this a lease agreement or equipment financing?

Zenergy does offer traditional financing; however, the Zero Cost Program is a Managed Energy Services Agreement.

What type of conservation technologies does Zenergy offer?

The Zero Cost Program™ encompasses a wide variety of conservation, smart controls, IoT and efficiency-based technologies designed to reduce and improve the consumption of electricity, natural gas and water.

This sounds like a "performance based" agreement; how is Zenergy different?

Zenergy's Managed Energy Services Agreement is performance based, however unlike most single-source suppliers who are simply trying to peddle a light-bulb or widget, Zenergy actually guarantees the reduction in usage for electricity, natural-gas and/or water; creating an immediate positive impact to YOUR bottom line.
